FOR IMMEDIATE RELEASE

Mathis Instruments Welcomes New International Distributors

October 28, 2004, Fredericton, NB – Mathis Instruments, developer and manufacturer of analytical instruments, is pleased to welcome five new distributors to their network of international distributors: AGESCO, International Chemical Scientific, TechMax Technical Co Ltd., Doo Ree Tech, and Spectronic Instruments.

“Establishing a network of distributors enables Mathis to strengthen its position world-wide,” said Karina Schmidt, Director of Product Development. “As Mathis continues its growth and expansion around the world, it is important that we continue to find the right channel partners who understand our business, can drive demand for our solutions, and can grow along with us.”

About AGESCO

AGESCO is a leading importer of control equipment, electrical components, metals and metal powder located in Maadia, Egypt. They are also an exporter of minerals including: calcium carbonate, kawleen, faced bricks, medical plants, olive oil.

About International Chemical Scientific

International Chemical Scientific (ICS), located in Seoul Korea, is owned and operated by Young Wook Ryu. ICS represents a diverse instrumentation portfolio with strong relationships in the electronics, fine chemical and pharmaceutical industries. www.icskorea.co.kr

About TechMax Technical Co., Ltd.

TechMax Technical Co Ltd. was established in 2002 and is located in Taipei City, Taiwan. TechMax provides professional, customized, and affordable products & services to meet the thermal analysis needs of their customers.

About Doo Ree Tech

Doo Ree Tech, located in Seoul, Korea, is an importer of laboratory and process equipment. Their current product portfolio includes: NIR Spectrometer, Calorimeter, Elemental Analyzer, and Polymer Contamination Analyzer. www.dooreetech.com

About Spectronic Instruments

Spectronic Instruments, located in India, represents diverse scientific instruments from well-reputed overseas manufacturers to various governments and semi-governments, R&D centers, universities, and defense laboratories.

About Mathis Instruments

Established in 1995 and based in Fredericton, NB, Mathis Instruments provides non-destructive, thermal sensor technology solutions for R&D, production and quality control applications, delivering fast, accurate measurement of thermal conductivity and thermal effusivity in seconds with virtually unlimited sample size.
